ABOUT THE KHORANA PROGRAM

The University of Wisconsin-Madison launched the Khorana Program for Scientific Exchange in 2008. Dr. Har Gobind Khorana, who won the Nobel Prize in 1968 for his work at the interface of chemistry and biology while a member of the UW faculty, generously agreed to lend his name to the program.

This exchange program fosters and expands interaction between the Indian and U.S. scientific communities and has proven to be transformative for both American and Indian students. For more information, go to:

www.biochem.wisc.edu/faculty/ansari/khorana_program/

ABOUT SASLI

The South Asia Summer Language Institute (SASLI) is a formal educational collaboration of the US Department of Education-designated Title VI National Resource Centers for South Asia in partnership with the South Asia Language Resource Center (SALRC). SASLI is dedicated to training students, faculty, and professionals in the languages of South Asia. It has been hosted at UW-Madison since 2003. This year SASLI is host to 92 students in 10 languages.

ABOUT THE INDIA INITIATIVE

Established in 2007, the University of Wisconsin-Madison India Initiative brings together faculty across campus, alumni, and friends to support, enhance, and increase awareness about India's arts, cultures, economy, history, religions and society.

Through collaboration with diverse departments and programs, and with support from alumni and friends, the India Initiative highlights scholarship and outreach efforts and facilitates new programs to help us better understand and engage with India's rising global prominence in such diverse fields as medicine, journalism, economy and industry, engineering, biotechnology, and law.

Recognizing the importance of India to the economic and political future of Wisconsin and the United States, this enhanced collaboration with and dissemination about India will benefit Wisconsin's businesses and citizens as a whole.
